

This work is a labor of love that represents the culmination of years of "songsmithing". We are neither seduced by the lure of fame nor enticed by riches.

This collaboration is only about the music. We have tried to mix various styles into songs that are fun, songs that are sad, songs that present a philosophical perspective...

WINDSTORM

...and those that paint pictures.

It has been some time since WINDSTORM first played to the public and it is notable that two generations of Larsens play on this CD, underscoring our values of family, morality and honor. It is our hope that each of these songs find a special place in your heart and, if we can get you to tap your foot, hum a melody or lift your spirit, then we have accomplished our task.
